## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 and 11-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Backman et al. (US 6,441,096).

Backman disclosed a multimodal ethylene polymer composition having a density of 0.930-0.965, a weight ratio of LMW/HMW of (43-51):(57-49), MFR<sub>5</sub> of 0.1-1.0 g/10 min, a dynamic viscosity at a shear stress of 2.7kPa of 260-450 kPa's, a shear thinning index (SHI) of 50-150, and a pressure pipe thereof (col. 2, lines 38-62; cols. 15-16, Examples 2 and 3; and col. 18, claims 1-10). Backman's ethylene polymer composition and pipe encompass the ethylene polymer composition and pipe of the instant claims.

Therefore, it would have been obvious to a skilled artisan at the time the invention was made to employ Backman's teaching to provide ethylene polymer compositions and pipes thereof because such is within the generic disclosure of the reference and all of the embodiments of the reference are expected to work and in the absence of any showing of criticality and unexpected results.

### ***Conclusion***

3. Prior art, Zhou et al. (US 2004/0034169 A1), made of record and not relied upon is considered pertinent to applicant's disclosure.
